## SG – 8 Edge Grinder

The SG-8 is a compact and robust surface grinder built to last with a 3-position adjustable head that allows users to quickly change from surface grinding to edge grinding. To allow for peak efficiency while edge grinding the operator can open a pivoting door for near zero-clearance edging. To help facilitate consistent passes and even tool wear, the SG-8 comes equipped with our floating tool driver. The tool driver and 4-way adjustability of the head result in extremely smooth operation. Lastly, the 4-position handle provides ergonomic positioning as well as easy transportation and storage. All of these features are complemented by our powder-coated  $\frac{1}{4}$ " steel frame to provide durability, longevity, and reduce harsh vibrations. **Proudly made in the USA.**

**SG-8**                      **M.S.R.P: \$3595.00**

**Power requirements:** Baldor 1.5 HP

**RPM:** 950 rpm

**Weight:** 150 lbs

**Head Pressure:** 60 lbs

**Additional weights:** 4 (2lbs each)

**Tool driver diameter:** 8" tool driver

**Arbor size:** 5/8"-11

**Drive:** Belt Drive

**Vacuum requirements:** 250 CFM with 2" dust port
